UNIQUE JACKPOT SYSTEM

When developing the jackpot system we took into account our extensive experience and therefore included an additional element in the jackpot draw, which allows the player to get even more excitement playing our games. Flashing fruits signal the approach of the jackpot game. This motivates the player to stay in the game longer.

MOTIVATION SYSTEM DAILY SPINS

DAILY SPINS (DS) it's our unique system of analysis players behavior for giving him free spins. The more player bets the more free spins he gets, but he can use these free spins just after 8 hours after ending the game. If he plays each day the percentage of cash back increases. This tool motivates the player to return and play more frequently.

LUCKY SPINS

Get Lucky Spins every day. Every day you will get more Lucky Spins. The promotion starts on Monday and will run for 7 days. On the first day you get Lucky Spins if you have made any bet. To receive the bonus the next day, you need to bet three times more than the amount of Lucky Spins of the previous day. The amount of lucky spins increases each day, so the player needs to bet more and more day by day for getting free spins. This system trains the player to play every day and increase the number of bets.
